### Professional Summary

AI Engineer with production experience building LLM pipelines, n8n workflow automations, and multimodal AI systems. Currently developing intelligent solutions for the bKash AML (Anti-Money Laundering) platform at DataSoft Systems Bangladesh Limited, working with LLMs (MiniMax M2.5, GLM-5, GPT-OSS 20B), video generation models (LTX 2.3, LTX 2, HumoAI), and RAG and fine-tuning pipelines (LoRA, QLoRA). Skilled in LangChain, LangGraph, vector databases, prompt engineering, Docker, remote GPU server administration, Angular frontend development, and web scraping. Experienced across the full AI/ML lifecycle from data ingestion and model training through to production deployment.

### Work Experience

| Company Name                       | Designation                  | Year                                   |
|------------------------------------|------------------------------|----------------------------------------|
| Cartify BD                         | Web Developer                | June, 2024 – Running                   |
| SIMEC System Ltd.                  | Trainee BlockChain Developer | October, 2023 - April, 2024            |
| DataSoft System Bangladesh Limited | AI Intern                    | 23 September, 2025 - 31 December, 2025 |
| DataSoft System Bangladesh Limited | AI Engineer                  | 1 January, 2026 - Running              |

#### DataSoft Systems Bangladesh Limited – AI Engineer (Jan 2026 – Present) | AI Intern (Sep 2025 – Dec 2025)

- Built and deployed multiple production-level n8n workflow automations integrating LLMs, APIs, and data pipelines for the bKash AML (Anti-Money Laundering) SiS platform
- Integrated and managed LLM models (MiniMax M2.5, GLM-5, GPT-OSS 20B) for NLP and financial intelligence tasks; deployed video generation models (LTX 2.3, LTX 2, HumoAI) on remote GPU servers
- Implemented RAG pipelines and fine-tuned LLMs using LoRA and QLoRA techniques for domain-specific tasks; built AI agents using LangChain and LangGraph with vector database integration

- Administered and maintained remote GPU servers running LLM and video model inference workloads; containerized AI services using Docker
- Applied advanced prompt engineering to improve model output quality; developed Angular frontend components for OpenClaw (process automation) and other platforms; built web scraping pipelines for ML data workflows

**Cartify BD – Web Developer (Jun 2024 – Present, Part-time)**

- Designed and developed full-stack e-commerce web features; built responsive frontend interfaces and optimised backend database queries for performance

**SIMEC System Ltd. – Trainee Blockchain Developer (Oct 2023 – Apr 2024)**

- Developed and tested Solidity smart contracts on Ethereum-based platforms; contributed to decentralised application (dApp) architecture and design

## Academic Qualifications

| Degree Details                                                                                                                                                            | Result           | Year        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|-------------|
| <b>Bachelors of Engineering</b><br>Institution : IUBAT – International University of Business Agriculture and Technology<br>Department : Computer Science and Engineering | 3.31 out of 4.00 | 2021 – 2025 |
| <b>Higher Secondary Certificate (HSC)</b><br>Institution : Dr. Mahbubur Rahman Mollah College<br>Subject : Science                                                        | 5.00 out of 5.00 | 2020        |
| <b>Secondary School Certificate (SSC)</b><br>Institution : Barnamala Adarsha School and College, Dania, Jatrabari, Dhaka-1236<br>Subject : Science                        | 5.00 out of 5.00 | 2018        |

## Projects

- n8n AI Workflow Automation Suite – Designed and deployed multiple production-level n8n automations integrating LLMs, APIs, and data pipelines for enterprise AI-driven process automation
- LLM Integration Pipeline – Integrated MiniMax M2.5, GLM-5, and GPT-OSS 20B into production systems; managed full model lifecycle including server deployment, API integration, and performance monitoring
- Video Generation AI System – Deployed and maintained LTX 2.3, LTX 2, and HumoAI video generation models on remote GPU servers; built inference pipelines and monitoring for production workloads
- RAG and LangChain/LangGraph Agent System – Built retrieval-augmented generation pipelines and multi-step AI agents with vector database integration for intelligent document Q&A and task orchestration
- OpenClaw Process Automation – Developed Angular frontend and backend integrations for OpenClaw, an enterprise automation platform; implemented web scraping pipelines to feed ML and data workflows

## Extracurricular Activities

| Role                     | Organization                                              | Duration    |
|--------------------------|-----------------------------------------------------------|-------------|
| Assistant Sports Manager | Sports Wing, IUBAT IT Society                             | 2021 - 2022 |
| Campus Ambassador        | Bangabandhu Inter University Sports Championship Season 3 | 2022 - 2023 |
| Executive Member         | IUBAT IT Society INTERIM Committee                        | 2024 - 2025 |
| General Member           | Basis Student Forum-IUBAT   Chapter III                   | 2022 - 2023 |

## Skills

### Technical Skills:

- AI & LLM: LangChain, LangGraph, RAG, Fine-tuning, LoRA, QLoRA, Prompt Engineering, Vector Databases
- LLM Models: MiniMax M2.5, GLM-5, GPT-OSS 20B | Video AI: LTX 2.3, LTX 2, HumoAI
- Automation & DevOps: n8n (production workflows), Docker, Remote GPU Server Admin, Linux
- Frontend & Backend: Angular, HTML5, CSS3, JavaScript, Python, Django, PHP, MySQL, REST APIs
- Other: Web Scraping, Blockchain (Solidity), MySQL Workbench, C, C++, C#, Java

### Language Skills:

- Bangla – Native
- English – Fluent

### Soft Skills:

- Strong cross-functional collaboration and communication skills
- Able to work independently and as part of agile, fast-paced teams
- Ownership mindset – takes initiative and drives projects to completion
- Thrives under pressure with a strong focus on delivery and quality
- Analytical thinker with a systematic approach to debugging and problem solving
